CRACKSEC Installation Instructions

Technical Information

Supported operating systems:

Windows Server 2000, SP3
Windows Server 2003, SP2
Windows Server 2008
Windows XP, SP3
Windows Vista
Windows 7

The user must have Administrator privileges on the PC to install CRACKSEC. The software can only be installed and run in stand-alone mode – a network version is not available.

CRACKSEC has been tested on both x64 and x86 processors and the latest version can be found on the ACES website at: www.aces-systems.com

Installation

1. Run the installation application called "*Cracksec-V2.XXXXX-Setup.exe*" on the PC you wish to install CRACKSEC on. The program cannot be run over a network.

2. Click the *Next* button then read and accept the licence agreement.

3. The default install location is "*C:|Program Files (x86)|Aces Analysis Systems|Cracksec*". You may change the location by selecting the "*Change..*" button.

4. After (optionally) changing the location click the *Next* button followed by the "*Install*" button.

5. The process is now complete.

6. If you wish to run CRACKSEC select the "*Launch*" check box and click "*Finish*".

7. When CRACKSEC starts for the first time it will require an activation key. A registration dialog box as shown below will be displayed allowing this key to be entered. If an activation key is not entered a 30 day demonstration/evaluation period will come into effect.

8. To register CRACKSEC and permanently unlock it email the software registration code (or a screen dump of the registration dialog box) to AAS at: aces@internode.on.net

9. If the program has already been purchased a software access key will be provided, permanently unlocking CRACKSEC. This key is _only_ valid for the PC or laptop onto which CRACKSEC has been installed. It cannot be moved to another machine.
